SUBJECT: Operational Report - Lessons Learned, Headquarters, 1st Cavalry Division (Airmobile), Period Ending 30 April 1968 (U)

SEE DISTRIBUTION

- 1. Subject report is forwarded for review and evaluation in accordance with paragraph 5b, AR 525-15. Evaluations and corrective actions should be reported to ACSFOR OT RD, Operational Reports Branch, within 90 days of receipt of covering letter.
- 2. Information contained in this report is provided to insure that the Army realizes current benefits from lessons learned during recent operations.
- 3. To insure that the information provided through the Lessons Learned Program is readily available on a continuous basis, a cumulative Lessons Learned Index containing alphabetical listings of items appearing in the reports is compiled and distributed periodically. Recipients of the attached report are encouraged to recommend items from it for inclusion in the Index by completing and returning the self-addressed form provide reports is compiled and distributed periodically. Recipients of the in the Index by comparat the end of this report. in the Index by completing and returning the self-addressed form provided

Assistant Chief of Staff for Force Development Department of the Army Washington, D.C. 20310

Section I:

1. Operations

A. General: Following the completion of a major deployment of the 1 ACD from BINH DINH Province and Southern I Corps Tectical Zone in late January, this reporting period covers the initiation of high intensity corbat operations in QUANG THI and THUA T'IEN Provinces. It encompasses three highly successful and tactically significant operations: (1) The TET Offensive, which saw the 1 ACD preventing the scizure of ONANG TRI and assisting in the expulsion of the NVA from their foothold in Hue City (Operation Jeb Stuart I): (2) Operation PEGACUS/LAN SON 207A which relieved the IVA pressure of the 26th Farine Regiment at EHE SANH; and (3) the entirely air-supported Openation DELAWARE LAM SON 216, which disrupted NVA activities by means of a reconnaissance in force in the A SHAU Valler. In each of these operations, the applied concepts, tactics, and doctrine of the 1 ACD were again proved successful. Cordon and search in conjunction with "Swooper" operations. initiated and refined or the BONG SON Plain, were again successful in disrupting the enemy infrastructure in NICTZ; and assisted in denging the enemy refuge among the populace. In Operation Pegacus, entire battalions were wirlifted over enemy strong points and assaulted on to critical terrain astride the enemy's route of withdrawal. This bold move with its corresponding use of firepower had a profound effect on the enemy's will to stand and fight. In many cases he left his fortified delaying position, abandoning large amounts of supplies and equipment, and fled in small groups to the safety of Laos or to rugged uncontested terrain.

At the opposite end of the spectrum of mobility was the ground attack to relieve Hue. Using tactics more akin to breaching the SIEGFRIED LINE than to bold, dashing Cavalry chrages, elements of the division attacked a strong, heavily bunkered enoug in weather that oft times precluded effective air and artillery support. The A SHAU Valley Operation was air-mobility in its finest hour. A dashing assault into an encore bastion long denied to US Forces and against modern anti-aircraft defenses enabled the 1 ACD, entirely supported by air, to room the valley at will for a period of almost

30 days.

During these operations, the 1 ACD demonstrated a considerable flexib-FOR OT RD

CONFIDENTIAL

and contracted at various times during the reporting period. At its peak, during Operation PEGASUS (The relief of Khe Sanh Combat Base), the Division controlled the operations of 20 infantry battelions plus their normal artillery, air and other supporting elements. This was a World War II Corps

During the reporting period, Operation JES STU/RT was officially terminated at 2400H 31 March 1968. The first results were:
(1) Friendly: 291 KIA, 1735 WIA, 24 MIA, 26 AC lost.

(2) Enemy: 3269 KIA, 110 PW, 585 TWC, 148 CSVC, 1314 Mine/HG, 76,837 SA ammo, 2906 lg cul rds, 89 tons rice.

Operation PETASUS/L:M SON 207A began at 0001H 1 April 1968 and toruinated at 0800H 15 April 1968. The final results were:

(1) Friendly: US Army: 41 KIA, 208 WIA, 5 MIA; US'C: 51 KIA, 459 WIA, 0 MIA; ARVN TF: 33 KIA, 187 WIA.
(2) Enemy: 1044 KIA, 9 FW's, 539 P.C, 184 CSWC, 12,085 le cal rds, 9527 mines HG's, 261,760 SA amno, 3.075 tons rice.

Operation DELAWARE commenced on 19 April with AA of elements of the 3d Bde into the Northern A Shau Valley. The operation continues into the next

B. 1st Brigade: At the beginning of the reporting veried, the Brigade was oriented towards the Ba Long Velley and enemy Base area lol. However, with the NVA threatening ON/NG TRI CITY, the briezde had to ranking redirect its effort in that direction. By the end of the first week in February, the Brigade had redeployed forces to Quang Tri, defeated the enery force battaling in the outskirts of the city, seized the initiative in the error from the enemy, and commenced pursuit operations. (see TAR A: The Bettle of Quang Tri). After the Battle of Quang Tri, the Erigade pursued the eracy throughout the coastal plains, Re Long Valley, Rase Area 101 and the area north of the TACH HAN River. Special emphasis was placed on joint operations with local ARVN forces. Operations were cordon and search, swooper, and hunter-killer. Psychological warfare and civil affairs teams were habitually used to support operations in populated areas. During davlight hours, search and clear operations were conducted throughout the 1.0 to locate the encmy and capture or destroy him. At night, the Brigade used hunter-killer teams and night ambushes to seek out the enemy and to interdict his movement on trails and waterways.

On 5 April, two battalions air assaulted (one from vic Quang Tri, and one from LZ Stud to which it had been airlifted during the assoult of the first battalion) into the PEGNSUS/LAM SON 207A AC. The Brigade CP was established southwest of Khe Sanh at LZ Snapper and the battelions conducted immediate and aggressive combat operations against moderate enemy resistance. One battalion remained in the vicinity of Guang Tri and conducted offensive operations vicinity the Southwestern approaches to the city in order to secure 1 ACD helicopter, assets largered at LZ Sharon. On 14 April, the Brigade CP and two battalions began their withdrawal from the Khe Sanh area and by 15 April, the entire Erigade was operational in the vicinity of Quang Tri City. For the next nine days, the Briende conducted operations in the vicinity of Quang Tri and prepared for future operations. On 24 April, the Brigade began a recommaissance in force in the A Shau Valley with one battalion conducting an air assault into the A Shau Valley and estable lishing a battalion fire base at LZ Cecile, west of A Luci. On 25 April, a second battalion of the Brigade air assaulted into A Luci where LZ STALLION was established. The third battalion and the brigade CP were then sirlifted

CONFIDENTIAL

Š

During the remainder of the reporting period, the Brigade conducted reconnaissance in force operations uncovering mony enemy logistical complexes. C. 2d Brigade: Until 29 February 1968, the Brigade conducted operations in the PERSHING II AO, OFCCN to IFFV. (See Incl B, Combat Operations After Action Report-Operation PERSHING JI ). On 1 March, the Brigade established a CP at LZ Jane and initiated operations with three battalions in the Jeb Stuart AO. This marked the first time the 1 ACO controlled all its organic units since July 1966. Throughout the remainder of Operation Jeb Stuart I, the Brigade conducted operations in Page Area 101, on the equatal plain vicinity of "The Street Without Jay", and along Sky King Wennes, leading from HAI LANG to the Gulf of Tonkin. Of principal concern was the security of Mundor Beach (an over-the-beach logistical facility), Sky King Avenue and QL-1 in sector. Operations on the plains were characterized by cordon and search and supposer operations in order to effect to demothe enemy refuge in populated areas. Several combined operations with local 'RVN forces assisted in initiating the destruction of the local VC infrastructure. Search and clear operations ponetrated Pase Area 101, and light resistance was met. On 3 April the Brimade conducted two battalin air assaults and one battalion airlift into an area Southeast of Khe Sonh. On 14 April the Bde with two battalions assumed the responsibility for the security of Khe Sanh and on 150800H April 1963 was released OFCON 1 MCD and placed OFCON 3d Marine Division. On- battalion had airlifted to Camp Evens on 12 Arril. For the remainder of the reporting period, the Bde remained OPCON to the 3d Marine Division.

D. 3d Brigade: During the first month of the reporting period, the Brigade participated in the battle of Hue City. Mary significant problems were encountered during the battle: poor weather, which hampered airmitile operations and close air suprort, a shortage of supplies, all coupled with the appearance of a determined professional energ. Although plaqued by low ceilings, poor visibility, and figree enemy resistance, the Bde drove the determined INA forces from their well prepared/fortified defensive positions and battled its way to the wells of the former imperial capital (See T.F C: The Battle of Muc). With the conclusion of the Battle of Mue, the emphasis of combat operations shifted to the coastal plains Northwest of Camp Evens and Pase Area 114 Southwest of Camp Evans. Offensive operations on the coastal plains were in pursuit of a badly besten enemy and in search of enemy caches and mortar/rocket locations. During this period, the Brigade launched the first US ground offensive into Base Area 174, in months. Against orly light resistance, the Brigade conducted operations to the heart of the area: however, due to the initiation of Operation Fernsus/ Iam Son 207%, it was not able to fully exploit the penetration. On 1 April the Brisade initiated operations in the PECASUS/LAM SCM 207A area of operations, hw a series of air assaults/airlifts to the cast of Khe Sanh Combot Rase. The Brigade staged vicinity of Quane Tri City with one battalian assaulting from that area while the other two were deployed forward to L2 5700 from where they were air assoulted/lamied into the AO. Against moderate resistance, the Brigade conducted operations destroying NVA forces Fast of the Senh and opening Highway 9 to Khe Sanh. On 8 April, ground elements of the Briende reached Khe Sanh Combat Buse and assumed the security mission thereof. On 14 April the Brigade was airlifted from Khe Sanh to Camb Evans where it commenced preparations for future operations in the A Shau Valley. On 10 April the Brigade initiated operation Delaware/Lom Son 216 with two battalions air assaulting into the northern portion of the A Shau Valley. The

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1059

initial entry was characterized by determined, accurate and multi-caliber anti-aircraft fire coupled with extremely marginal flying weather. Only by 23 April was the Brigade closed into the valley compared with the 4 plus hours required to close in Operation PEGASUS. For the remainder of the reporting period the Brigade conducted reconnaissance in force operations in the northern portion of the A Shau Valley and uncovered major NVA logistical and combat support complexes. Weather during PEGASUS precluded high intensity airmobile operations prior to 1200 hours whereas in DELAWARE, operations were normally precluded after 1200 hours.

E. 1st Brigade, 101 Abn: During the period 1 thru 18 March, the Brigade conducted combat operations to the Southwest of Mue along Michaely 547. As the Brigade established fire bases from East to West in the vicinity of Highway 547, aggressive operations were conducted to destroy enemy forces in sector. Against moderate enemy resistance, the Brigade hegan to successfully neutralize enemy forces. Saturation patrolling and night ambushes were extremely successful. On 18 March the Brigade was returned OPCON to the 101st Abn Division.

F. 2d Brigade, 101 Abn: During the period 1 February to 10 March, the Brigade conducted operations on the coastal rlain vicinity of "The Street Without Joy" and along Sky King Avenue. Of principle concern was the security of the developing over-the-beach logistical base at Winder Reach, and the 5ky King Avenue/CL-1 land LOC. Cordon and search operations in confunction with the National Police Field Forces again proved successful as this brigade employed this 1 ACD technique. Continuous davlight retrols and night ambushes were required along QL-1 to reduce mining incidents. On 2 March the Brigade assumed the responsibility for the southern portion of the Jeb Stuart I AO and moved from the vicinity of LZ Jane and Wai Lang to the area between Hue and the An Lao bridge to facilitate return to its parent division. In the new Brigade AO, operations were directed toward the establishment of fire bases and the conduct of search and clear operations in the populated areas north of Hue. On 10 March the Brigade returned Groon to the lolst Abn Division.

G. 1st Marine Regiment: During the period 29 March to 15 April, the Regiment conducted operations in the Fegasus/Lam Son 207A area of operations under the operational control of the 1 ACD. On 1 April the Regiment with two battalions launched an attack along the highground to the West from Ca Lu along Highway 9. One battalion operated in an AO vicinity of LZ STUD. The Regimental mission was to attack in zone destroying or capturing energy forces and securing and assisting engineers in the reopening of Mighway 9 in sector. To accomplish the mission the Regiment conducted a number of limited objective attacks against light enemy resistance. Operations were initially concentrated along Highway 9; however, as the situation developed the Regiment conducted operations several thousand meters to the North and South of Highway 9 using modified airmobile techniques. Only minimum security forces were required to protect the road and engineer work parties on QL-9. On 15 April the Regiment returned OPCCN to the 3d Marine Division.

H. 26th Marine Regiment: During the period 31 March to 15 Amil, the Regiment, freed from its static positions in and near Kho Sanh by the 1 ACD, began operations under the operational control of the 1 ACD. As the 1 ACD advanced toward Khe Sanh by leaps and bounds, enemy activity around the beseiged combat base ceased. Indirect fire attacks diminished and virtually disappeared and enemy ground troops fled from the battle field. Thus, the Marines were able to leave their fortified positions and attack the hills to

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968

the North, West and South, held previously by the enemy. Only moderate resistance was encountered and the Rogiment was returned OPCCN to the 3d Marine Division 15 April.

I. III ARVN ABN TASK FORCE: On 7 April, in cooperation and coordination with the 1 ACD, the III ARVN ABN TF initiated joint corrations in the Fegasus/Lam Son 297A area of operations. To the southwest of the Sanh, the TF conducted a battalion size air assault and two battalion size airlifts to LZ Snako (XDRO8378). During the report period, the TF conducted a series of limited objective attacks against moderate resistance West to the Leos border. On 15 April the TF terminated operations in the Perasus/Lam Jon 2074 area of operations.

J. 3d ARVN Regiment: On 29 and 30 April two battalions of the Regiment airlifted to 12 Lucy vic Ta But in the central A Shau Valley. The 2d 3n 1st ARVN Regiment, attached, was to follow on 1 May. Here they initiated a joint recommaissance in force operation in cooperation and coordination with the 1 ACD. The operation continues into the next reporting period.

K. 196th Light Infantry Prigado: On 20 April the Privade arrived at Camp Evans and was placed OPCON to the 1 ACD. Given the mission to secure Camp Evans and conduct combat operations in the vicinity, the Privade utilized 1 ACD aviation assets to accomplish the required tasks. Treas of principal concern were the security of CL-1 in sector, and the market belt vicinity of LZ Jack. Extensive operations were conducted against shoradic light resistance to the Southwest of Camp Evans while numerous mitrols, nicht ambushes, and reinforced bridge security rositions discouraged er any attempts to interdict CL-1 in sector.

L. 1-9 Cavalry: During the report period, the Soundron continued to conduct recommaissance of the Division area of operations and to provide support to the Brigades on a mission basis. Initially, C Froop was assimed the Northern portion of the AO and B Trp was assigned the Southern portion. As a rule, C Trp supported the 1st Ede and 2d Ede 101 /hn, while B Troop supported the 3d Bde. D Troop provided conver security on CL-1 between Quang Tri and Camp Evans. On 17 Feb A Troop deported the Perchine II AC and joined the Squadron in the Jeb Stuart I AO. This marked the first time the Squadron had operated with all organic resources since 5 April 1967. During the remainder of the report period, the concept of operations assumed the familiar role of one troop in General Support of each brigade. The Squadron continued to conduct intensive first and last light reconssistance around Camp Evans, LZ Sharon, LZ Jone, and the Wurder Beach Complex. Except for special operations, emphasis of reconnaissance was directed in base areas 101 and 114, Ba Long Valley, and on the Coastal Plains. In the month of April, the first half of the month saw the Squadron conducting extensive operations around the Khe Sanh Combat Base in Operation Femasus/Iam Son 2070. Due to a total lack of tactical intelligence concerning the area in and around Khe Sanh, the 1-9 Cav commenced reconnaissance operations on 26 March vic of LZ STUD and ultimately extending west of the Sanh to require hard intelligence and to destroy enemy forces, anti-aircraft positions, and resources with artillery, tactical air, and B-52 are light strikes. The combination of 1-9 Cav recon resources working with messive fire support assets provided a classic example of fire and maneuver once the 1 400 maneuver battalions were integrated into the operation on 1 April. When the operation came to a close on 15 April, the Squadron initiated extensive reconnaissance in the A Shau Valley in Operation Delaware/Lam Son 216 in the same marner as in Operation Pegasus.

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1938

M. Combat Support Elements:

(1) Division Artillery submitted by separate report.
(2) 11th Aviation Group: Headquarters, 11th Aviation Group operated from Camp Evans until 30 March 1968, and them displaced to LT Stud in type port of Operation Pegasus. On 15 April the CP returned from LZ Stud to Camp Evans. Significant operations in which the 11th Aviation Group perticipated were:

(A) JEB STUART I (1 February-31 Murch):

(1) During February, priority of aviation support went to the 3d Brigade during the Pattle of Hue. 3d Brigade elements were in makerate to heavy contact throughout the month. Aviation support was severely hampered by extremely adverse weather. This was further approvated by hostile fire, mortar/rocket attacks and a low availability of mission readvaircraft. Lightning Bug missions were conducted nightly along Highmy CL-1 to reduce mining incidents and NVA movement along the road.

(2) As the weather improved and the Battle of Hum ended in the first part of March, the number of combat assaults increased throughout the AO. When the 2d Brigade displaced from the Pershing AO, four MRF's were required on a daily basis (one to each of the divisional brimdes and one to the 2d Bde, 101st Airborne Division). Aviation essets were deployed in depth throughout the AO to disperse resources and to insure maximum responsiveness for the supported units. Humerous emergency resupply missions were required. One resupply conducted for the 1st /RVN Division in the vicinity of Quang Tri (YD3/4629) resulted in 26 NVA KIA by D/229th gunships. On several occasions during the month, the stand-by flare ship was required by units in contact. Weather conditions precluded VFR flight. consequently, the aircraft was given a GCA vector to the site of the engagement. After contact was established with the ground commander, flares were released and then adjusted by the ground unit. On 22 Forch the 229th AFR executed a CA with simultaneous touch downs of three 6 + 2 flights southeast of Ocana Tri around an enemy complex. Throughout March, planning was in progress for Operation Fegasus. The quartering party closed at LZ Stud (XD D11483) on 24 March and the tactical CP closed on 30 March.

(B) PEGASUS (1-15 April):

(1) Pre-Assault: On 24 March the oungreing party moved to LZ Stud and began work on command and communications bunkers. Reconnaissance of the area and proposed LZ sites were conducted by commanders and flight leaders. The assault elements of the 3d Brigade were pre-positioned at LZ Pedro. On 30 March the 11th Aviation Group moved to LZ Stud and operation control was transferred from Camp Evans on 31 March.

(2) Initial Assault: D Day commenced on 1 April with the 3d Brigade air assaulting and airlifting into the Pegasus AO, while two 1st Marine Regiment attacked with 2 battalions west from Ca Lu along highway 9. One battalion of the 3d Brigade air assaulted and a second battalion airlifted to LZ MIKE. The third battalion of the Brigade air assaulted into LZ CATES (XD 932432). On 2 April (D+1) the battalion which was previously airlifted to LZ MIKE air assaulted to (XD 899403) and established LZ THCR. The 2d Brigade, on 3 April, (D+2), air assaulted one battalion and airlifted one battalion into LZ WHARTON (XD 878363) while the third battalion of the Brigade air assaulted into LZ TCM (XD 898342). On 5 April (D+4), the 1st Brigade air assaulted one battalion and airlifted a second battalion into LZ SNAFPER (XD 844347). The ARVN Airborne Task Force assaulted/airlifted into LZ SNAKE (XD 810378) on 7 April (D+6).

(3) Extraction: The 1st and 3d Brimdes of the 1ACT and the ARVN Airborne Brimde becan withdrawing from the Fegasus AC on 11 April. This extraction was conducted by a combination of Air Force Aircraft using the Khe Sanh and L? Stud airstrips, or anic aircraft, and vehicle cxvoy. The main command element of the 11th Avirtien Group displaced to Care Evans on 14 April. The rear operations element coased operations at L? Stud

(4) Communications: During preliminary planning for this operation it was readily apparent that serious communications problems would be encountered. LZ Stud was sited in a bowl shaped mountainers area located 54 kilometers from Comp Evans. A relay site was established on Hill 440, just west of Stud; however reliability problems persisted. ment shortcomings reduced the effectiveness of the ... voice/RTT net. In all probability this system would have provided effective and reliable com-Zouizmunications if the AM equipment had been operating.

(C) JEB STUART II (16-18 April): Routine support was provided to the Division during this period. In addition, support was provided to the 196th Light Infantry Brigade, OPCCN to the 1st ADD. This period was utilized to improve aircraft availability and plan for Operation Delaware.

(3) 13th Signal Eattelien: During the reporting period, the 13th Signal Battalion provided communications to the Division Task Organization

(a) Operation Pershing II: 1-29 Feb (BER DIFF Province)

(b) Operation Jeb Stuart I: 1 Feb-30 Mar

(c) Operation Penasus/Lam Son 207A: 31 Mar-15 Apr

(d) Operation Jeb StuurtII: 16-18 Apr (e) Operation Delaware/Lam Son 216

During the month of February, the Pattalion continued to provide communications support for the 1 ACD in operations Pershing II and Jeb Sturet I. Direct communications were maintained with the 2d Brigade at LZ Uplift and the 1st Provisional Pattalian at Camp Radeliff using A" radio. Motor messenger service was also provided to the Div AG at Camp Endeliss. In Air Signal Courier made daily runs between An Khe and Fhu Bai vic C-7% Aircraft. At the Division CP (Camp Evans), the following services were provided:

(1) FM Radio (Secure and non-secure) (2) AM Radio (Voice and secure telety e)

(3) Telephone switching system

(4) Communication Center (Secure teletype)

(5) Motor messenger service Although communications commitments continued throughout the month, there were no serious difficulties encountered.

During the month of Morch, plans were finalized for Operation Regasus/ Lam Son 207A. A Sub-area signal center was deployed to Camp Evans to provide telephone service at that location. The depl yment of Signal equipment for Operation Pegasus presented major difficulties. The location of the Division CP at LZ Stud, and surrounding terrain required the use of a relay site, Hill 440, to the west. The relay site was secured by ground forces on 26 March, but enemy contact procluded night operation until 29 March. Additionally the site required extensive earth work prior to emplacement of signal equipment. Provisional Corps signal equipment was moved to the hill by Division aviation assets. After installing Corps Tropo and V-F systems on the hill, extreme difficulty was experienced in establishing the Corps circuits. Major items of equipment failed (TRC-97 trensmitter and

generators) and inexperienced operators on the Corps VHF systems could not establish the required circuits. At the request of the Division Signal Officer, more experienced Corps personnel were flown in to get the circuits established. This effort on Corps systems took supervisory effort away from the divisional systems. In smite of these difficulties, the Division CP had switchboard service, radio circuits and VHF systems to the Brigades/Regiments prior to the Division CP displacement from Camp Evans. Even after displacement, Corps teletype circuits and TOC hot lires had not been established. Work continued on these circuits and satisfactory service was received four days after the Division CF had displaced.

Operation Delaware began with the establishment of an FM radic ard a VHF relay site on "Signal Mountain" (Hill 1487). Long Range Fatrol, engineers and signal personnel were inserted on the hill top to secure a communications radio relay site for the operation. Non-flyable what her delayed operations for two days. Once the site was secured and closed, relay communications for the Division TAC CP were installed. Difficulties were encountered in airlifting communications equipment to the relay site throughout the period due to non-flyable weather. A qualified pathfinder was assigned to control air traffic on the third day of operations. The relay site was also used as a weather station and artillery fire base. Communications personnel were employed throughout the period in assisting infantry units in defense of the area.

Six automatic FM radio-retransmissions sets and two VHF radio relay set were installed on the site to maintain FM radio and telephone communications between units operating in the A Shau Valler and LZ Evans.

On 29 April 1968, a Division T'C CP was established at LZ Stallion. No serious difficulties were encountered during this move. The following communications were installed:

(1) Fi radio (secure and non-secure) to all major sub-

ordinate commands.

11

(2) AM radio (voice and secure teletype) to all major subordinate commands.

(3) VHF radio telephone communications to the two committed Brigades, 3d ARVN Regt and LZ Evans.

(4) Switchboard and telephone service at L7 Stallion. (4) 8th Engineer Battalion: During the reporting region the tactical operations in the Jeb Stuart AO. In the latter stages of this quarter, Operations Pegasus (1-15 April 1968 and Delaware (19 Arril to the present) increased the tactical scope, causing a similar increase in engineer support. Initially, all available resources were committed in surrort of OL-1, developing new landing zones and fire bases, and promoting installations in the new AO. Elements that had remained in the Tershing AO to support the 2d Brigade returned to the battalion in late February. Extensive work was done on major LZ's to develop helicopter langer, refuel, and rearm facilities without detracting from the direct support provided to the maneuver battalions engaged in tactical operations. Construction was initiated on three airstrips during the reporting period. At Camp Swans, a 150'x3100' strip was completed by mid April for C-130 aircraft, with work still in progress on a parking apren. At LZ Stud, a 150'x2500' strip was built to support Operation Pegasus (1-15 April) and at LZ Stallion, a strip presently being constructed in support of Operation Delaware (19 April-present). Elements of Mobile Construction Bettalians 4,5 and 10 provided engineering support to the 1st Air Cavalry Division throughout the reporting period,

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1068

being joined by the 11th Engineer Battalion (USMC) during Operation Persons. In addition, the 14th Engineer Battalion, 45th Engineer Group, has initiated operations in support of the Division by daily mine sweeps and the placement of D Company in direct support of Division elements at Comp Evans.

2. Discussion and Analysis of Major Operations: Operation JFB STU/RT I (17 Jan-31 Mar 1968); Operation PEG/SUS/L/M SCW 2074 (1-15 April 1968); Operation DELAW/RE/L/M SON 216 (19 April-continuing) (for task organizations see T/B D).

A. JEB STUART I.

. (1) General: TOE, attached, and supporting units of the 1 ACD conducted combat operations in Quang Tri and Thua Thien Provinces during Operation JEB STURRY I. The enemy TET offensive was conducted during Operation JIB STUART I and consequently the Division was engaged in heavy contact on numerous occasions. The Battle of Hue, which lasted the entire month of February (See TAB C), was one of the two very significant contects in the JEB STUART AO. Results of the battle were 404 enemy KIA, 15 captured, and 18/ weapons captured or destroyed. The other significant contact was the Battle of Quang Tri (See TAB A). In contrast to the Battle of Hue, the Battle of Quang Tri lasted only seven days. Results of the battle were 900 enemy KIA, 300 weapons captured or destroyed with the City of Quana Tri never being occupied by the enemy. The month of February was a critical period of the war in the First Corps Tactical Zone. The enemy launched what he believed to be an offersive carable of an easy victory, whereas in reality he met defeat. One major item which attributed to the enemy's defeat was his lack of understanding and appreciation of the 1 ACD's flexibility, mobility and firerower-a unit whose presence in ICTZ he had certainly not anticipated.

With the conclusion of the enery TST offensive, there was a significant decline in enemy contacts. During the reporting veried, the enemy was statempting to regroup his fighting posture while avoiding detection or actual contact with the forces of the First Team. In order to demy respite to the enemy, the 1 ACD quickly initiated pursuit organisms following the enemy on the coastal plain and deep into known enemy base areas. During the month of Morch, the 1 ACD penetrated Base area 101 with 99 reconnaissance missions and 77 offensive operations. Base area 114 was penetrated by 48 recommans.

sance missions and 14 offensive operations.

(2) Other significant actions occurring in the JEB STURRY I AO were:

(a) On 2 February, an aircraft from B Troop, 1-9 Cav, in surport of the 3d Brigade in the vicinity of Hue, became the target of intense ground-to-air fire. The aircraft was hit and crash-landed in enemy controlled territory. The crew escaped serious injury, but was immediately engaged by small arms fire. While the crew was being extracted by a Marine helicopter (CH-46), scout aircraft engaged the enemy resulting in 15 KIA's. In scattered contacts throughout the remainder of the day, the troops killed an additional 20 enemy resulting in a total of 35 enemy KIA for the day.

(b) On 7 February, aircraft of C Troop, 1-9 Cav, while performing

(b) On 7 February, aircraft of C Troop, 1-9 Cav, while performing first light recommaissance around Dong Hn, observed a wall fortified area at coordinate YD 194610. The area was engaged resulting in 12 NVA KU. Exploiting the area of contact, C Troop 1-9 Cav continued to develop the situation and in scattered contact in the vicinity of YD 200621, the troop engaged and killed another 41 NVA.

(c) On 16-17 Feb, N1-9 Cav and B/1-8 Cav engaged in heavy contact with elements of the 803d Regt, 324B Division vicinity YD 433403.

Results of the engagement were 29 NVA KIA and 4 AK-47, 2 SKS Captured, and 1 RPG destroyed. Friendly losses were 9 KIA, 5 WIA from 1-8 Cav and 2 KIA from 2-20 Arty. At 161400H February, A/1-8 Cav and B/1-8 Cav were combat assaulted vic YD 433608 to conduct search and clear operations to the Northwest. As soon as the ground elements deployed, the scout team working with B/1-8 Cav received S/A fire northwest of the companies locations. ARA received extensive ground fire from this same location resulting in 2 US KIA. Arty and air strikes were employed against the enemy and these were followed by a ground attack. Both companies continued to meet heavy resistance and at 1900H withdrew into a mutually supporting night FOB. Artillery was fired into the contact area all night long and the following morning an artillery TOT was fired followed by employment of CS, followed by a ground attack. TAC air could not be employed on 17 February due to marginal weather conditions.

(d) On 18 February 1968, at 0107H, vicinity YD 392544, C/1-8 Cav while in a night perimeter was attacked by the 5th Company, 803d Regt. 324B Div. An OP observed 40 individuals moving toward the perimeter. The OP was withdrawn and the enemy was engaged with artillery. At the same time the perimeter came under 60mm mortar, 8-40 rocket, and small arms fire. At 0145H a UH-1H flareship came on station. At 0215H the fire ceased and an emergency resupply ship was brought in which drew enemy fire. A medevac ship took out 4 WIA at 0235%. At 0245H the perimeter again came under sporadic mortar and small arms fire. Artillery engaged a suspected terget at YD 391550. At 0220H Moonshine (USAF C-47 flareship) replaced the UH-1H flareship. All firing ceased at 0350H. At 0415H, a 2d Moonshine came on station. At first light a check of the area revealed 6 NVA KIA, 6 AK-47, numerous drag marks (body), and 3" of documents. Friendly casualties were 4 US KIA and 4 US WIA. During the day the unit found 2 more NVA KIA and 5 B-40 rockets, 150 rounds of S/A ammo, 19 Chicom grenades, 26 AK-47 magazines, 1 carbine magazine, and assorted NYA equipment.

(e) On 19 February at 1530H, in a combined search and clear operation vicinity YD 363610, A/1-12 and C/1-12 Cav came into heavy contact with an estimated NVA Company. After initial contact was established the units pulled back and artillery was fired into the contact area. TAC air could not be employed due to marginal weather conditions in the target area. Both companies continued the attack through the area killing 8 NVA. ARA ships engaged several groups of enemy in hedgerows who were trying to evade the contact area and accounted for 38 NVA KIA and destroyed 3 light machine guns.

(f) On 22 February at 1500H vicinity YD 315505 A & C/1-3 Marrines, acting in response to a report from the Senior Sector Advisor of Quang Tri, conducted a cordon and search operation with a PRU team, resulting in the capture of 5 hamlet cadre and 17 hamlet guerrillas.

(g) At 1303H on 24 February vicinity YD 362594 first brigade scouts in support of B1-12 Cav killed 11 NVA and captured 2 9mm pistols, 1 PPS-43 SMG, assorted web gear, and Chicon grenades.

(h) On 1 March, 1-501 Abn made contact with an unknown size enemy force north of the An Lac Bridge on the Song Bo River. Sixteen NVA were killed by the airborne troopers who were supported by ARA, tube artillery, 1-9 Cav gunships and tactical air strikes.

(i) On 2 March, 1-7 Cav made contact with an unknown size enemy force vic YD 6211, killing 12 NVA and capturing two pistols and two rifles.

(j) Cn 10 March, a last light recon team from 1-9 Cav working in the foothills near Base Area 114 spotted an advance party of a possible regimental size unit on a well used trail. The NVA soldiers were immediately taken under fire and the area was marked by smoke. An AH-1G (Cobra) was sent to the area in support of the recon team. After 20 minutes of aerial rocket and machine gun fire from the three ships, 32 NVA soldiers were killed. Although late in the day, a decision was made to insert an infantry platoon of 1-9 Cav to exploit the action. While on the ground, the infantry captured 3 weapons and one pack. Movement was detected around them, and to keep from being decisively engaged, they were extracted without incident. The recon team covering the extraction killed 7 more NVA.

(k) On 13 March, C/2-7 Cav in a village at YD 558473 killed 5 NVA. The company received 60mm mortar fire with neg casualties. In the same area the company captured several tons of rice hidden in false graves.

(1) At 250900H Mar 68, A/1-8 Cav assaulted two separate LZ's: one on the south and one on the north of the hamlet of Thon Xuan Duong. Upon landing, both LZs were Green. At 0918H units on both LZs were receiving heavy fire from all directions. ARA and Brigade Scouts were on station and engaged the areas. The third platoon of D/1-8 Cav which had conducted a "Swooper" operation vic of YD 387558 earlier moved by foot to a position vic YD 399553. D (-)/1-8 Cav further south, attempted to move to the west to rejoin its sister units; however, intense SA, AW & B-40 rocket fire prevented this. Following the unsuccessful maneuver of D/1-8, A/1-8 and C/1-8 conducted coordinated attacks supported by A/1-9 Cav, artillery, ARA and CS to link up with the two platoons. The attempt failed because of intense enemy fire. Artillery, ARA, and gunships continued to engage the area. A/1-8 (-) and C/1-8 were resupplied by logships and established defensive positions in the center of a village. Contact remained sporadic until 1930H when it was broken. During the hours of darkness, illumination was provided by "Spooky" and by "Moonshine." The target area was engaged by artillery throughout the night. POW's captured earlier in the day indicated that the companies were in contact with the K-14 Main Force Bn minus its heavy weapons company. A search of the battle area the following morning revealed that the enemy had exfiltrated in small groups to the northeast. Results of the battle were: 276 NVA KIA, 6 small arms weapons and 1 LMG captured.

B. PEGASUS/LAM SON 207A

(1) General: Operation PEGASUS/LAM SON 207A will become a classic: example of fire and maneuver combining artillery, tactical air and B-52 arc light strikes with a massive employment of troops using airmobile tactics and techniques. In the operation, the mission of the 1 ACD and its nondivisional units, was to relieve Khe Sanh Combat Pase; re-open QL-9 from Ca Lu to Khe Sanh; and destroy enemy forces in the PEGASUS AO. To accomplish the mission, the 1 ACD was augmented by the following non-divisional units: 1st Marine Regiment, 26th Marine Regiment, III ARVN Airborne Task Force, and the 37th ARVN Ranger Battalion. Although the enemy may have initiated a withdrawal of troops prior to Operation PEGASUS, it soon became evident he had no intention of allowing the combined force to march to Khe Sanh unosposed. He had established successive blocking positions, oriented toward the Eist, on critical terrain astride QL-9. Based on the organization of these delaying positions a conventional attack westward along QL-9 would not only have been costly in casualties, but would have taken a much longer period than 1 week to reach the desired objective, Khe Sanh.

On 14 March engineer construction began on a 150' x 2500' airstrip and a logistical complex at LZ STUD. By 29 March the strip was opened for C-7A

treffic and by 7 April the strip was capable of receiving C -123 traffic: On 26 March (D-6), 1-9 Cav supported by tube artillery from LZ STIM, TAC AIR, and responsive B-52 are light strikes, commenced its reconnaissance efforts west of Ca Lu. As no tactical intelligence of value was available on the Khe Sanh area, 1-9 Cav had to accuire sufficient information on the enemy and the terrain in order for the tactical plan to be completed. In arcs of aver increasing distance west from Ca Lu and LZ STUD, 1-9 Cav pinpointed enemy concentrations and anti-aircraft sites and immediately brought to bear on these varied ordnance. By 1 April, sufficient intelligence concerning the enemy had been obtained, his anti-aircraft wearons neutralized. and the 1 ACD prepared to launch its missive heliborne asseult. On 1 April, the 1 ACD commenced the attack toward Khe Sanh with the 1st Morine Regiment conducting a ground attack west from Ca Lu along OL-9 and the 3d Brigade, IACD, air assaulting two battalions and sirlifting one battalion onto critical terrain behind the initial enemy delaying positions, about half wav between Ca Lu and Khe Sanh Combat Base. On 3 April, the 2d Brigade, 1 ACD, air assaulted two battalions and airlifted one battalion to the Southeast of Khe Sanh and on 4 April one battalion of the 26th Marine Regiment emerged from its static defensive position and attacked and seized Hill 471, south of Khe Sain Combat Base. On 5 April, the 1st Brigade, 1 ACD, air assaulted one battalion and airlifted a second battalion to the Southwest of Khe Sanh. On 7 April, the III ARVN ABN TF air assaulted one battalion and airlifted two battalions to the west of Khe Sanh near the Laptian horder. The rapid employment of allied troops along the entire length of the enemy's line of communication/withdrawal had a devastating effect on his morale. In many instances, enemy forces left their well designed delaying positions abandoning large quantities of supplies and equipment, and attempting to cyade back in to Lacs or on to rugged. uncontested terrain. With the energy on the run and the allies in hot pursuit, the enemy could retaliate only with indirect fire from Laos—the only offensive means available to him at the time. Although largely ineffective, the enemy launched repeated rocket/ mortar/artillery attacks against many of the established allied fire bases. On 8 April sky troopers of the IACD were welcomed by the 26th Marine Regiment at the Khe Sanh Combat Base. On 12 April Highway 9 was opened from Ca Lu to Khe Sanh and by 15 April the operation was terminated. Part three of the LACD mission had not been completed, but the importance of displacing the 1 ACD to the A Shan Valley overrode this consideration.

(2) Significant actions occuring in the PEGGUS LAN SON 2071, area of operation were:

(a) On 4 April elements of the 25th Mar Rest attacked South from Khe Sanh Combat Base, seized Hill 471, and repulsed a determined NVA counter attack. Results were: 192 NVA KIA.

(b) On 5 April, A/1-0 Cav at XD 829366 and XD \$252 srotted and engaged NVA in fortified positions and in the open. Results: 53 NVA KIA

(c) On 6 April as the 2-7 Cav continued to attack west along QL-9 toward Khe Sanh Combat Ruse, the battalion encountered numerous pockets of enemy resistance. Results of a continuous day of fighting were: 83 NVA KIA, 122 IV.C, 10 CWC.

(d) On 7 thru 10 April, the 2-5 Cav conducted attacks in the vicinity of the old French Fort (XD 883382) against determined enemy resistance. Results were: 43 NVA KIA, 15 CSWC, 53 IWC.

(e) On 7 April, Wi-9 Cav XD 843345 spotted and engaged NVA troops both in the open and in fortified positions. Results were: 42 NVA MIA.

- (f) On OSO400 April, elements of the III.RVN :BN TP at LZ SNAKE came under a mortar and ground attack. Artillery, APA and direct fires assaisted in the defense of the LZ. At 06304 contact broke. Results were:
- (g) On 10-11 April, elements A/1-9 Cav discovered a lurge ammo cache and a truck loaded with ammo and supplies. Air strikes were placed into the area. The next day, while conducting a BDA of the area, elements of A Troop observed armored vehicle tracks which led to the discovery of two well campuflaged tanks. The tanks were destroyed by airstrikes along with 15 NVA KII.
- (n) On 11 April, the 1-12 Cav attacking toward the Lang Vei Special Forces camp made contact with an enemy force of unknown size at XD 785357 resulting in 27 NVA KIA. The next day upon entering the Special Forces Camp the 1-12 Cav killed 13 more NVA and captured 11 C3W and 10 JW. C. DELAWARE/LAM SON 216.
- (1) General: Operation DELAWRE/LAM SON 216 bears on 19 April 1068. The operation was preceded as in Operation FFMASUS, by the employment of the 1-9 Cav in an intelligence acquisition role as tactical intelligence on the A Shau Vallev was again conspicuous by its absence. Pin-pointing and destroying anti-aircraft weapons using artillery, tactical cir, and 9-5° are light strikes was again modus operandi. At the end of three consecutive good flying weather days, sufficient intelligence had been acquired and anti-aircraft positions neutralized to initiate the operation. Reset on intelligence provided by the 1-9 Cav, the initial assault was changed from vicinity A Luci to the vicinity of the northwestern end of the valley. The operation was designed as a "Reconnaissance in force" directed against the enemy and his supply areas located in the A Shau Valley. For public information purposes, the operation was dubbed a "speiling attack." Two bautalions of the 3d Brigade air assaulted into the Northern portion of the A Shaur Valley on 19 April. Hampered by extremely bad weather in the objective eres, the entire Brigade was not closed until 23 April and this only after fantastic feats of airmanship under IFR conditions performed by the eviators of the 11th Avn Group, 1-9 Cav, 2-20 ARA and brigade aviation platoons. On 24 April one battalion of the 1st Brigade air assaulted into LZ CTCILE vic a Luoi and by 25 April the entire Brigade was deployed in the central portion of the A Shau Valley. On 29 April one battalion of the 3d APVN Regt airlifted to LZ LUCY, vic Ta Bat, and by the end of April the majority of the Regiment was conducting operations in the South/Central portion of the A Shau Valley. On 29 April the forward Division command post was established at A Luci and by the end of the report period engineer reconstruction of the cirfield at A Luci was virtually complete.

(2) Significant Actions occuring in the DELAWARE LAM SON 216 area

of operation to date:

(a) The night of 19 April, 5-7 Cav observed what they remorted to be a large convoy of 60-100 trucks near L7 Tiger. Artillery encaged resulting in a large secondary explosion.

(b) On 25 April, at YD 312075, A/1-7 Cav found three flat bed trucks and three 37mm anti-aircraft guns. The trucks and guns were all in

working condition. 300 rds of ammo were present.

(c) On 26 April, near LZ Tiger, D/5-7 Cav engaged an estimated

platoon size enemy force. There were 12 NV. KIA.

(d) On 30 April, near LZ Tiger, C/5-7 Cav found four 37mm antiaircraft weapons with 500 rounds of emmunition. No enemy resistance was encountered. 13

Section II. Lessons Learned

A. Personnel: None

B. Operations.

(1) Use of CS.

(a) OBSERVATION: CS continuous to be an effective means to

route and disorganize the enemy.

- (b) EVALUATION: The use of CS against enemy positions can cause the enemy to leave making them a more vulnerable target to organic and artillery fires.
- (c) RECOMMENDATION: That units employ CS at every opportunity, and have protective masks readily available.

(2) Enemy Mortar and Rocket Firing

(a) OBSTRYATION: The enemy rossess the earability to mortar and rocket friendly installations anywhere in the 40.

(b) EVALUATION: One of many methods for quickly locating these

locations is to utilize the intersection method.

(c) RECOMMENDATION: That every soldier he trained to be rert. icularly alert for enemy mortar and rocket flashes. Upon sighting flashes, a soldier should immediately take an azimuth reading to the flash and render a report through his command channel.

(3) Armor Seats in LOH.

(a) OBSERVATION: There is a need for botter armor sents in the

OH-6A helicorter.

- (b) EVALUATION: The armor seats in the LOH are designed so that there is approximately a 2 inch gap where the back seat and front seat junction. The chances of having a round come through this gap is remote: however, it has happened, resulting in serious injury to the pilot. The observer successfully landed the aircraft preventing a loss of crew and aircraft.
- (c) RECOMMEND: TION: That armor seats be redesigned, closing the gap in the seat.

(4) Recovery /ircraft.

(a) OBSERVATION: In the past, it has been a common practice to have a flight leader responsible for all downed aircraft. Normally when a flight consisted of 12 or more aircraft, the battalion maintenance air-

craft accompanied the flight.

- (b) EVALUATION: These procedures have proven inadequate where there is intensive enemy activity and large flights of aircraft involved. When the flight consists of 12 or more UH1's, a minimum of two recovery aircraft are necessary to extract downed crews (troops). Relieving the flight leader of this responsibility insures he can devote his full attention to his mission. The presence of recovery aircraft also enhances crew morale.
- (c) RECOMMENDATION: That two (or more depending on size of flight) recovery aircraft be assigned to any 12 UPG or larger flight.

(5) Supporting Fires for Log Mircraft

(a) OBSERVATION: During the Battle of Hue, log aircraft were continuously exposed to hostile fire while carrying suprlies to the ground units. Numerous aircraft were hit and several shot down. Coordination: was made with the supported unit for covering fires during the arrroach, unloading and departure of the log aircraft.

(b) EVALUATION: Surporting fires included representative weapons of all calibers to include artillery. Gun-target lines and fileht

routes were coordinated. The log aircraft called in his position at prescribed poims and the fires were fired as appropriate. Screening smoke could also be used effectively to cover a mission.

(:) RECOMMENDATION: That this technique be publicized and used as required.

(6) CH-54 IFR Operations

(a) OBSERVATION: CH-54 sling loads must be properly secured

during IFR operations.

(b) EVALUATION: The CH-54 is capable of carrying sling loads under IFR committions; however, certain limitations are imposed in the interest of safety. Single point suspension loads are unsatisfactory; however, loads can be carried IFR with the four point hook-up by securing the load with aircraft hoist. In addition loads can be carried in the crane rod (maximum of 9,000 pounds) under IFR conditions.

(c) RECOMMENDATION: That CH-54 sling loads be secured using the four point hook-up or by use of the crane pod during IFR operations.

- (7) Dual Aircraft for Log Missions (a) ORSERVATION: As a result of excensive hostile ground to air firing, single aircraft missions in and out of field positions should be avoided.
- (b) EVALUATION: Flying log aircraft in rairs o'viously requires additional planning and coordination by logistics control team at each battalion. However, when log aircraft fly dual missions, instant crew recovery can be accomplished in the event one of the aircraft goes down. Flight following is enhanced and simplified as the aircraft are mutually supporting.

(c) RECOMMENDATION: That dual log ships be used when dictated by the tactical situation and as aircraft availability permits.

(8) Medevac at Night in Poor Weather

(a) GBSERVATION: Medevac by helicopter can be accomplished during periods of darkness and poor weather in cases of extreme emercency.

(b) EVALUATION: Techniques were developed during the reporting period to conduct medevac at night during periods of poor weather in cases of extreme life or death emergencies. Search lights are utilized and a line of constant artillery illumination is fired to the vicinity of the PZ. At the PZ ground illumination is utilized to guide the medevac helicopter on its lest leg. Artillery illumination continues in a line to guide the helicopter back to its own pad where rotating beacons are used to suide the returning helicopter.

(c) RECOMMENDATION: That this technique be utilized when

applicable.

(9) Mine Sweep Procedures

(a) OBSERVATION: Many units establish a procedure for mine sweeps and then never deviate from it.

(b) EVALUATION: This action has the advantage of assuring the commander a thorough, well controlled sweep. However, it also gives the enemy the advantage of being able to predict movements. He is then able to place his mines and booby traps to inflict maximum damage.

(c) RECOMMENDATION: That units engaged in daily mine sweeps alter their methods of sweeping from different directions and on a non-

scheduled basis.

(10) Command Detonated Mines

(a) CASTRYATION: In Northern I Corps Zone, the enemy is employing numerous command detonated mines in conjunction with convertical mine warfare.

(b) EVALUATION: Command detonated mines render considerable damage to mine sweep teams. On more than one occasion, individuals of sweep teams who have discovered a mine and are about to uncover it have literally been blown to pieces by command detonated mines.

(c) RECOMMENDATION: That the security element work at least 100 meters to either flank and forward of the sweep team and execute a vieorous search for the enemy while one man is placed in either ditch with a

grappling hook dragged behind him on the ground.

(11) Spot Mine Sweeps

(a) OBSERVITION: The use of engineer troops in the lord webfile

of a convoy to provide a spot mine sweep has proved quite offective.

(b) EVALUATION: This method of mine sweep can be used by a tactical commander over routes normally traveled by friendly troops but eccessible to the enemy during periods of darkness. However, if the speed of the convoy is in excess of 10mph, the spot mine sweep loses its effectiveness and cannot provide the desired safety to the convoy.

(c) RECOMMENDATION: The tactical commander he informed of the

spot mine sweep concept.

(12) Hasty Repair of Runway Soft Spots

(a) OBSERVATION: Quick repair of small portions of forward air-

fields supporting a limited tactical operation is a necossity.

(b) EVALUATION: The backhoo, model 34.14 can be effectively used to scoop out centralized soft spots that do not most the boaring requirements established under MACV criteria. By replacing the poor material with river rum or a suitable substiture, the danger area can be ouicidy erased.

(c) RECOMMENDATION: That the 3414 backhoe be included in the

initial lift of equipment for rehabilitation of existing airfields. .

C. Training

Sling Out for Engineer Dequipment

(a) OBSERVATION: During Operation PROMSUS and DOLAWARE, it became evident that personnel were not proficient in breakdown and rigging for sling out of all types of airmobile equipment.

(b) EVALUATION: These operations emphasized the need for con-

stant training of personnel in all aspects of sling out.

(c) RECOMMENDATION: That units conduct training of all personnel in proper sling out techniques and that riggers from the 15th Ses ... Bn present training as necessary to each unit within the 1st Mir Cavalry Division.

D. Intelligence

(1) Overt Liaison Contact (CI)

(a) ORSTRVATION: An effective liaison program between intel-

ligonce agencies is required.

- (b) EVALUATION: Pv positioning personnel in large cities in areas within the Division AC, and in those cities in the Division TAOI where there are a number of allied intelligence agencies, an effective liaison program has been established, which has resulted in the effective and timely transmission of intelligence information from numerous sources not previously available. This is particularly noticeable in the areas of Quang Tri and Hue.
- (c) RECOMMENDATION: The practice of establishing permanent liaison teams should be incorporated in the intelligence program.

(2) Translations by ARVN Interpreters

(a) OBSTRVATION: A Requirement exists to insure accurate translation of intelligence documents. 16

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968

- (b) EVALUATION: Because of the language barrier existing between US and SVN personnel, interpreters are assigned to the CI Section, 191st MID. Their duties frequently require them to translate intelligence reports from SVN agencies. Recause there is no way for US personnel to deturmine the completeness of the translation, the document, after being translated by one interpreter, is given to a second, who has no knowledge that the document has been previously translated. By comparing the two translations, a better assessment of the completeness of the translation can be made.
- (c) RECOMMENDATION: That this double check system be SCP in translation of intelligence data where SVN personnel serve as interpreters. (3) Processing Wounded Prisoners

(a) OBSERVATION: Many PW's having information of intelligence value are evacuated through medical channels.

- (b) EVALUATION: During the reporting period, there were at least 8 PW's of interest to the division who were evacuated through medical channels.
- (c) RECOMMENDATION: In order to insure that no intelligence of value is lost, the following should be accomplished:

(1) Tag WIA FW's in same manner as other PW's.

 $(\bar{2})$ Units should submit spot reports on WIA P's through normal channels.

(3) Medical facilities should notify nearest IT element immediately upon receipt of a WIA PW.

(4) Limitation of AN/PTS-4 Radar

(a) OPERVATION: The AN/PPS-4 Radar cannot provide full coverage in rainy weather.

(b) EVALUATION: The AN/PPS-4 Radar does not give satisfactory results when employed in the rain.

(c) RDCOM'EMDATION: That efforts be made to obtain AN/FFS-5 Radar to replace the AN/PFS-4.

(5) Incomplete Capture Data on IFW's.

(a) OBSERVATION: Prisoners of war are frequently improperly documented.

(b) EVALUATION: In order to insure timely and accurate interrogation of detainees, it is necessary to provide the interrogator with as much information about the detainee and circumstances of capture as possible.

- (c) RECOMMENDATION: Detainees should be evacuated to Div TV with complete capture data and any documents and weapons in their possession at time of capture. Capturing unit should tag each detainee using MACV form 365 (Detainee Card) or a facsimile thereof. Information should include: DTG of capture, location of capturing unit, circumstance of centure, name and any weapons or documents found on detained. If at all possible, documents and weapons should be evacuated with the detainee. Division PW Cage has received many detainees during this reporting period with incomplete or no capture data.

(6) Falsified Documentation by the NVA/VC
(a) OBSERVATION: The NVA and VC have been falsifying GVN

official documents, such as identity cards.

(b) EVALUATION: Information developed during the recent TET offensive reveals that the NVA/VC have been most successful in duplicating official GVN documentation such as identity cards. To date, there has been no report of US documentation being falsified. However, the NVA/VC have the apparent capability.

(c) RECOMMENDATION: Commanders should be alert to report any incidents of suspected falsification. Reports should include samples of the suspected documentation and all suspects should be retained until the documentation is verified.

7) Reaction to LRP Team contacts.

- (a) OBSERVATION: Findings of LRP Teams are often not exploited. (b) EVALUATION: Recently a LRP Team made contact with an estimated two NVA squads. The supported unit was unable to react to the contact and consequently the 1/9 Cav immediately extracted the team and two NVA.
- (c) RECOMMENDATION: As future situations similar to this may be expected to arise, it is recommended that the supported unit react by sir lifting a platoon and one empty slick to orbit near area of contact. Thus airborne, the commanders can make an immediate evaluation of the situation and if werranted drop the platoon in to reinforce the team in contect and develop the situation.

(8) Rapid Evacuation of PW's to Division Collection Point.

(a) OBSERVATION: Prisoners must be evacuated to intelligence

agencies as rapidly as possible.

- (b) EVALUATION: PW's must be evacuated as soon as feasible to the Division Collection Point to allow for detailed interrogation. Capturing units and subordinate headquarters should exploit the FW's for immediate information of tactical value and expedite evacuation of the PW's to Division IFW.
- (c) RECOMMENDATION: Failure to rapidly evacuate PW's causes unnocessary inquiries from higher HQs and denies the Div HD valuable timely intelligence information. Therefore, a procedure that provides for rapid evacuation must be established.

E. Logistics

(1) Pre-stock of supplies prior to operations.

(a) OBSERVATION: Combat operations can be facilitated by pre-

stockage of supplies for major operations.

(b) EVALUATION: Prior to the initiation of Operation PIGASUS a 3 day stockage objective of all classes of supplies was pro-positioned at LZ Stud. This pre-stockage enabled the operation to commonce without logistic difficulties. However, the Division was required to use organic resources to establish a significant amount of this pre-positioning because of the lack of FSA support. This resulted in utilization of organic resources and manpower which would have otherwise been used for internal preparation of waits and equipment for entry into the operation.

(c) RECOMMENDATION: Whenever possible supplies should be prestocked at a forward supply base prior to the initiation of operations in a new area. The FSA support agency should perform the pre-stockage mission with organic resources thus permitting the division to preprie its re-

sources for entry into the operation.

(2) FSA support.

(a) OFSERVATION: FSA support must be provided in each forward

operational areas.

(b) EVALUATION: On Operation DELAMARE an FSA was requested to support the two brigades and the ARVN Regiment operating in the A Shau Valley. This request was not granted by 1st Log Cmd; the only support provided was augmentation for the FSE. This arrangement was unsatisfactory.

(c) RECOMMENDATION: Whenever a brigade or larger size element of the division operates in a new area an FSA must be provided to supply wholesale delivery of Class I, III, and V.

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968

(3) Clearance of drop zones.

(a) OBSERVATION: Drop zones must be cleared of heavy vegetation

(b) EVALUATION: On Operation DELAWARE supplies were air dropped on r drop zone which was overgrown with elephant grass and underbrush. As a result bundles were extremely difficult and sometimes impossible to recover. Many were lost and never recovered.

(c) RECOMMENDATION: Prior to using such an area for a drop zone it should be cleared by burning if possible.

(4) Limiting stockage.

(a) OBSERVATION: Supply stockage must be monitored and controlled according to plan.

(b) EVALUATION: On Operation DELAWARE a large stockage of supplies, particularly Class V, was built up. When the order came to begin extraction, a massive effort was required to back-haul this stockage.

(c) RECOMMENDATION: In all operations, but particularly one which are of limited duration in remote areas, the supply stocks must be closely monitored and controlled so that excessive stockages do not occur which could cause problems in tactical redeployment.

F. Organization

(1) Crew homber's Individual Weapon

(a) OBSERVATION: The .38 caliber pistol is considered unsatis-

(b) EVALUATION: Recent operations in the ICTZ have shown that when confronted by a well equipped and supplied enemy, a downed crew may have to defend themselves for an extended period prior to extraction. Most crew members have requested and carry shot guns, M-16 rifles, and assorted surplus weapons. The unit TOAE's do not allow for the issuance of more than one weapon to an individual. If an aircraft is forced down, the requirement for greater range and firepower exists.

(c) RECOMMENDATION: That the CAR 15 or M-16 be the TOE individual

(2) Authority for Fourth Line Company

(a) OBSERVATION: The recognition by Combat Development Command of an urgent need for a fourth line company in the 8th Engineer Battalion emphasizes the requirement for an immediate operation change.

(b) EVALUATION: In the early stages of operations in the JEB STUART I AO, there were no additional engineer units available on a general support basis for the division. Consequently, general support was obtained by removing some of the direct support available to each committed brigade. A similar situation occurred in Operation PEGASUS and is being experienced now in Operation DELAWARE. The battalion cannot deliver the effective direct support needed on a continuing basis by the brigades without a general support capability. The fourth line company would solve this problem.

(c) RECOMMENDATION: That TOE 5-215T be immediately revised to reflect the necessary changes.

(3) Firebase Sets

(a) OBSERVATION: Operations PEGASUS and DELAWARE established requirements for the airmobile engineer equipment necessary to open new landing zones and fire bases.

(b) EVALUATION: A fire base set of engineer equipment is comprised of an airmobile dozer (12,000-16000 lbs) and a backhoe, model 3414. These two pieces of equipment have proven to be essential in the developing of fire bases in the tactical areas of operations. Since the committed brigade

usually open at least two fire bases, a requirement exists to increase the equipment authorization for these two items.

- (c) RECOMMENDATION: That TOE 5-215T be immediately revised to reflect an increase in 3414 to size authorized to enable each line company to employ two each on a continuing basis. That the number of authorized dozers be delivered to the unit, l.e. six are authorized and only two are on
  - Miscellaneous
    - (1) 02B Tape Missions (Psyops)

(a) OBSERVATION: Many 9th ACS 02B tape missions were cancelled due to artillery fire.

(b) EVALUATION: On many occasions, after the 02D aircraft arrived at the Brigade AO, the pilot was denied entry into the AO to broadcast over target area. Many of the missions were cancelled after clearance into the AO was

(c) RECOMMENDATION: The tactical situation permitting, every effort must be made by fire support coordinators to clear psyops aircraft into the AD.

(a) OBSERVATION: When a division deploys, there is an increased need for military police personnel.

(b) EVALUATION: When the 1st Air Cavalry Division assumed its mission in the JEB STUART I AO, it undertook the security of Highway 1 and Sky King Avenue. Since these were the major supply routes within the JEB STUART I AO and were also important links in the supply system of I Corps, a major effort had to be mounted by the division to insure the safe and orderly flow of traffic along these roadways. In order to move traffic in an orderly manner on these restricted roads, a disproportionate amount of the division's military police resources had to be committed to the task. In order to alleviate this drain on men and equipment, augmentation of additional military police was requested from the 18th Military Police Brigade through the USARV Provost Marshal. Although initially approved, the augmentation was later diverted to support the forming of the Provisional Corps Vietnam.

(c) RECOMMENDATION: When divisions are deployed to areas that require military police to assume roles beyond those for which they are designed, attachment of the required additional military police should be furnished upon deployment. If this is accomplished, the additional personnel are capable of receiving full logistical support from the division from the outset. Likewise, the division is capable of successfully performing the

(3) Location for Polygraph Examinations

(a) OBSERVATION: A requirement exists for convenient access to polygraph facilities.

(b) EVALUATION: During the conduct of certain Reports of Investigation, the polygraph is utilized. It is a valuable tool when properly utilized by investigator personnel. Trained operators of this instrument are located at the Long Binh Headquarters of the Criminal Investigation Group (Provisional), 18th Military Police Brigade. These qualified examiners conduct the polygraph examination upon approval of the Provost Marshal, USARV. These polygraph examiners will not conduct the examination in the field or in an area that is mutually convenient to both parties. In the case of the 1st Cavalry Division, it would be advantageous to be able to conduct such examinations in Da Nang; instead of having both the

investigator and the subject travel to Long Binh and return. Adequate facilities exist in convenient locations throughout Victnam and the equipment is designed in order that it may be carried to such areas,

(e) RECOMMENDATION: The Criminal Investigation Group adept the policy of conducting polygraph examinations in mutually convenient locations. It is recognized that careful site selection should be employed but adequate facilities appear to exist in many of the Criminal Investigation

4 (4) Maintenance of Control by Military Police During Base Development (a) ORSERVITION: Military Police assistance is often required early in base development.

(b) EVALUATION: The development of a base facility that will encompass a command post, airhead and supply element requires the carly employment of military police in order to establish and ther maintain control throughout the complex as it expands. Traffic requiation at such a complex becomes a matter of concern as the supply facilities expand and an increasing wolume of trucks have to be positioned, off-loaded as rapidly as possible, and then disputched for the return trip that same day to the sumply points. Military police are required during this stage to establish and then maintain

(c) RECOMMEND.TICN: That military police be programmed to arrive at the site of proposed command posts in sufficient time to develop and then implement effective traffic and personnel controls. By being included among the first elements to arrive, a logically developed plan can be implemented and then enforced.

- AVII-GCT (13 Jun 68) 1st Ind MAJ Sanderson/dpw/2506 SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968 (U)
  - DA, HQ, PGV, APO San Francisco 96308 1 0 Jul 1968
  - TO: Commanding General, United States Army, Vietnam, 4PO San Francisco 96375
  - 1. (II) The inclosed CRIL, 1st Cavelry Division (Airnobile), is forwarded IAW UDARY Reg 525-15.
  - 2. (C) Comments on Section 1, Operations: Significant Activities, are listed below
  - a. Item: Page 3, para 1D. Due to the general nature of the statement, it cannot be determined what specific supply shortages existed or the reasons therefore. However, temporary shortages of Class II and Class IV supplies existed during the Battle of Hue City.
  - b. Item: Page 7, para 1M(2)(B)(4). The main difficulty encountered was one of interface of teletype circuits on US Army Tactical VHF-Carrier Systems with UNC AN/TRC-97 tropospheric scatter systems. The problem was resolved when more experience parsonnel were committed to assist in establishing the circuits. The experience gained will be valuable in precluding similiar difficulties during future joint communications operations.
  - 3. (C) Comments on Section II, Lessons Learned: Commander's Observations, Evaluation and Recommendations, are listed below.
    - a. Item: Use of CS chemical agent, page 14, para B(1). Concur.
    - b. Item: Enemy mortar and rocket firing, page 14, para B(2). Concur.
  - c. Items: Armor seats in IOH, page 14, para B(3). Concur with recommendation. The reporting unit should submit an equipment improvement recommendation (kIR) IEI para 3-7.4, TM 38-750.
  - d. Item: Recovery aircraft, page 14, para B(4). Concur when feasible. Crew recovery must be made as the mission permits. Mission requirements have priority over either aircraft or crew recovery. Many cases may arise where assets will not permit use of two or more aircraft for recovery. Thus, a hard and fast rule cannot be applied to the number of aircraft assigned to this type mission.
  - e. Item: Supporting fires for log aircraft, page 14, para B(5). Concur. This procedure is discussed in Chapter 3, Section IV of 1st Avn Bde Operations Manual.
  - f. Item: CH-54 operations, page 15, para B(6). Concur. Single point suspension loads are not recommended for IFR operations.
  - g. Item: Dual aircraft for log missions, page 15, para B(7). Concur when feasible. Aircraft availability permittin, the use of dual aircraft greatly improves the flight following and is considered a crew morale factor of great importance.

AVII-GCT

1 U JUL 1958

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968 (U)

- h. Item: Redevac at night in poor weather, page 15, para B(8). Concur in principle. In a valid emergency all possible means of illumination may be used, Now ever, each case will differ because of terrain, cambility of the artillery, the ene threat along the route of flight and the proficiency of flight crews. This does not appear to be a flight technique applicable to a variety of circumstances. Fecause of the hazards of disorientation and inadvertent instrument flight, such missions should be performed only by instrument rated crews with proficiency in night flying.
- i. Item: line sweep procedures, page 15, page 16). Concur. Daily mine sweep should alter their methods by sweeping from alternate directions and at varying times minute changes in terrain.
  - j. Item: Command detonated mines, page 15, para B(10). Concur.
- k. Item: Spot mine sweeps, page 16, para B(11). Concur. Spot mine sweeping operations will be performed by engineer personnel only after dismounting from their vehicle.
  - 1. Item: Hasty repair of runway softspots, page 15, para E(12). Concur.
  - m. Item: Sling out for engineer equipment, page 16, page C. Concur.
  - n. Item: Overt liaison contact, page 16, para D(1). Concur.
- o. Item: Translations by ACM interpreters, page 16, para D(2). Concur in principle. The practice of translating each document twice is a waste of time and assets. A spot check could be performed occasionally and serve the same purpose.
  - p. Item: Processing wounded prisoners, page 17, page 18. Concur.
- q. Item: Limitation of Al'/PPS-4 redar, page 17, para D(4). Concur. The Al/PPS-5 redar is coming into the inventory. Responsibility for recuisition is incumbent upon the unit authorized this equipment by TOE.
  - r. Item: Incomplete capture data on IPWs, nage 17, para D(5). Concur.
- s. Item: Falsified documentation by the VC/NV:, page 17, para D(6). Concur. Commanders should be advised by their intelligence officer as to the importance of this information being reported.
- t. Item: Reaction to LRP team contacts, page 18, page D(7). Concur. Rapid reaction to significant LRP team contacts will increase the value of the information received.

29 AVII-COT

1 0 JUL 1968

- SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968 (U)
- u. Item: Rapid evacuation of PW's to division collection point, page 18, para D(8). Concur.
  - w. Item: Frestock of supplies prior to operations, page 18, para 5(1). Concur.
- w. Item: FSA support, page 18, para E(2). Monconcur. The support furnished for Operation DELAMBE included both FSA (wholesale) support by Task Force Landey and augmentation for the Forward Support Element (FSE). Tholesale supply support forward is dependent upon establishment and security of lines of communications. These conditions were not sufficiently established to permit another forward FSA to contribute to the mission of Operation DELAMME.
  - x. Item: Clearance of drop zones, page 19, para E(3). Concur.
- y. Item: Limiting stockage, page 19, para E(4). Concur. Such controls are most effectively exercised by FSE's and provide savings in supply expeditures and manpower, and provide for timely movement of priority supplies with reduced expenditures of transportation assets.
- z. Item: Crew member's individual meanons, page 19, pera F(1). Concur. This change can be requested by MTOE submission.
- aa. Item: Anthority for fourth line company, page 19, para F(2). Concur. This change can be requested by LIDE submission.
- ab. Itcm: Firebase sets, page 19, para F(3). Concur. This change can be requested by MIDE submission.
  - ac. Item: 02B tape missions, page 20, were G(1). Concur.
- ad. Item: Use of military police remon el, page 20, para G(2). Concur. In the initial deployment of a division to an area that does not have area military police, additional military policemen should be attached to the division to aid in handling missions beyond the division's capability. Once area support has been established these military police should be returned to their parent units. This procedure was followed with the 1st Cay Div (NI), but only after they had been in the new location several weeks.
- ae. Item: Location for polygraph examinations, page 20, para G(3). Monconcur. The frequency of use by the divisions of the polygraph and the requirements of a suitable location for administering the examinations (air conditioning, sound proofing, steady current and good lighting) do not warrant the establishment of temporary testing locations. The centralization of polygraph equipment and personnel at Long Binh allows for its most efficient use.
- af. Item: Maintenance of control by military police during base development, page 21, para G(4). Concur.

SUBJECT: Operational Report for Quarterly Feriod Ending 30 April 19'8 TAB E: Weather and Terrain

1. JEB STUART I (Feb-Har). Crechin weather resulting from a moderately strong northeast monsoon affected the JE B STUART AO from 1 Feb to 27 Feb. Some clearing was evidenced on the last two days of the month, although moderate early morning fog was present on those two days also.

Significant effects of the crachin were: ceilings were less than 1500 feet greater than 50% of the time (much of this was less than 500 ft); visibility less than or equal to 3 miles about 60% of the time, and less than 5 miles 85% of the time; measurable precipitation fell on 25 days with a trace recorded on one other; temperatures were 10 degrees below expected maximums but were within one or two degrees of expected minimums; relative humidity remained at

its annual high (90-100%).

The previous record, to our knowledge, for rersistence of crachin weatherwas 22 consecutive days. This occured along the Red Piver Delta, which is the area of maximum crachin activity, statistically. Although only 2,69 inches of precipitation accumulated during the month almost no evaporation took place due to heavy cloud cover and high relative humidity. Additionally, the daily range of temperatures was only 5-7 degrees when 10-15 degree range was expected. Relating this abnormal crachin weather to the global weather picture it appears, from data available, that the month of February was more severe than average in many parts of the northern hemisphere. This seems especially true on the east coasts of the continent. Since crachin weather and its initiator, the northeast monsoon, have their origins in the continental air mass of east Asia, any departures from within this air mass reflected in the local day-to-day weather in areas down stream from the source region. This seems to be a case much in evidence throughout the JVA STUART AO in the month of February.

During the first two weeks of Merch, moderate on-share flow brought low stratus and fog conditions throughout the JAR STUARY And Ceilings were 500° at night but generally raised to 1500° to 2000° during darlight hours. Visabilities were poor at night and in the morning (\$\frac{1}{2}\$ miles), and increased to 4-5 miles in have during the day. The latter part of the month was characterized by southerly flow during which overall conditions improved. Occasional occurences of stratus still brought ceilings of 700°-1,000°, and ground fog was common but daylight ceilings averaged 3000°. Haze continued to limit visibility to 5-6 miles. The extreme and mean temperatures were: Mex 94/87; Min 62/70. Rain fell on 12 days with accumulation of 2.21 inches. Average relative humidity was 87%.

2. PEGASUS, JEB STUART II, DELAWARE (April). Operation PETASUS and Operation JEB STUART II were relatively unaffected by weather. Fog and low stratus limited operational hours to the period OSOO-2000 hours on many days. However, during these hours ceilings of 2000' or better and visibility of 5 miles or greater were predominant. Showers fell on 6 days but the accumulation did

not significantly affect operations.

Operation Delaware was adversely affected by a late-season frontal passage on D+2. Accompanying the passage were very low ceilings, fog, and intermittent drizzle and showers. These conditions persisted for Your days. As the frontal system dissirated conditions improved somewhat with daytime ceilings 2000' to 3000'. Even these ceilings tended to partially obscure same of the higher peaks. Night time for and low stratus persisted through month's end. Precipitation accumulation was not a significant factor.

Maximum temperatures for April: Extreme 98, mean 88; minimum temperatures for the month: extreme 62, mean 73. Rainfall: Coast 2.67 inches: mountains

3.53 inches. Mean Relative Humidity 87%.

CONFIDENTIAL 3

TAB E.

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1968 TAB F: Enemy Activity

1. JEB STUART I (Feb-Mar). Prior to launching the TET Offensive, the 812th Regt, 324B NVA Division moved from the west to Guang Rinh (P) NVN cn 3 December to Base Area 101 to participate in the atrack on Chang Tri City. Other participate already in the Cuang Tri area were the Alath Pn, 5th 'Wa Regt, and the 10th Sapper Bn. The 6th Regt was operating from Rase area 111. in the vicinity of Hue. The newly formed 4th Rest operated in the Phy Loc area. The 12th Sapper Bn and the Hue City Sapper Bn operated to the west of Hus City under the control of Tri-Thien-Hus Military Region HO. The 910th LF Bn was operating South and West of Hue.

The unsuccessful attack of Quang Tri City was launched at 0300 hrs 31 January. The principle reasons for its failure were noor coordination, lack of reconnaissance, and underestimation of the 1st ACD's carebilities. Amproximately 700 were killed. After the attack part of the 912th Regiment moved to the Thac Ma River area South and East of Hai Lang. Other elements returned to Base Area 101.

The enemy attack on Hue City achieved surprise and was successful in seizing a major portion of the city. As pressure from allied elements increased the enemy was forced back along the western wall. The 416th Ri, 5th Regt, which had moved from the Hai Lang Forest, arrived in Hue to reinforce en 17 February. It passed south of Khe Sanh, through the Ra Long Valley, through Base Area 101 and 114, through the La Chu area and arrived at Hue on 22 and 23 February. The 7th Bn entered the city on 22 Feb. Elements of the 8th : ... red on the following day. The 29th Regt, 3250 NVA Div, had also The pressure moved from the Khe Sanh area to reinforce enemy elements of Hue. exerted from the west of the initiated on 21 Feb by the 1st ACD, dispelled any enemy hope of permanently holding Hue. On 25 Feb enemy elements vacated the city with the 6th Regul, 30th Regt (-) and 29th Regt (-) moving to the west and southwest of Hue and the 4th Regt moving south to the Nam Mos area was controlled by the Tri-Thicn-Tuc 'R MO which was located southwest of the city. Enemy losses in the battle are presently carried at over 5000 enemy 'illed.

Since the battle of Hue City elements of 803d Regt, 374th NV Div have moved east along the coast from the Cua Virt area to a rosition north and northwest of Hue. The 48th and 52d Regt's of the 320th MVA Miv have moved from the Cam Lo area toward Cua Vict. Within the JTA STUTT AT, the enemy has been concerned with the evacuation of the Hue area and protecting supply routes along the Thach Mr and Song Bo Rivers for supply of Pase from 191 and 114 (southeast) respectively. Fnemy construction on route 547 from A Show Valley to Hue City and indications of large movements of fresh units and replacements show the determination of the chemy to attempt new large scale at-

tacks in the Quang Tri-Hue Area.

KIA-NVA/VC 1,563/150; CAFTURED- PVA/CS 32/9; VEAFONS- \$1/CS:351/106 During the first 2 weeks of March the enew continued to reorganize, reinforce, and resupply in preparation for a renewed offensive. Operations against allied units initially appeared to be harrassment in nature, characterized by stand off attacks by rocket and/or mortar fire, interdiction of communications routes, and extensive use of mines and booby traps in areas critical to friendly supply activities. The enemy increased his activity in the A Shau Valley and along Route 547 to establish a large logistical base and a secure communications route west of Hue. The numerous rocket positions oriented toward 15 and allied installations, and a decrease in normal activity indicate the imminence of a renewed offensive.

TAB F

SUBJECT: Operational Report for Charterly Period Ending 20 treil 1000.

TAB F. Enemy Activity (Cont)

In addition to normal suprly and security movements the enemy haven prepositioning units in preparation for renewed offensive action. The Alth Bn , 5th Rest moved from Base Area 101 to the coartal plains area northwest of Hai Lang and Cuang Tri City, and conducted population control operations in preparation for the attack on Cuang Tri City. The 2d Pn, Angel Rest moved southeast from the Cuang Tri City area and joined the remainder of the ANGA Regiment in the vicinity of Hue. This move was accomplished in less than 36 hours.

During the last two vocks of March the Allies launched aggressive attacking against known and suspected enemy concentrations, with the 1st ACD attacking into Base Area 101 and Base Area 114, the 101st Abn Div attacking northwest of Hue and southwest of the city along May 547, and 1st APVN Division attacking west, north, and south of Hue and west into the straing area north of Hwy 547. ARC Lights, Air Strikes and Mayal Gunfire were employed against known enemy concentrations. The Allies quickly gained the initiative, disorganized the enemy, and forced the enemy to abandon his plans for an offensive, at least temporarily.

KIA-NVA/VC 352/207; CAPTURED- NVA/VC 36/L2; WEAPOIS- SA'CS 225/37 2. PEG/SUS, JEB STUART II, DELAMARE (April). During the reporting period, the First Team completed two operations and continues in a third. The first fifteen days of April, during Operation Pegasus/Lam Son 207A, the enemy contimued withdrawing from the Khe Sanh area, with large segments of his estimated 16 battalion force moving to the west into Laos. Operations against allied forces consisted primarily of delaying tactics for the first week, degenerating into full-scale retreat from the wast firenower of the airmobile forces. The enemy was forced to abandon large amounts of environment, wearons and ammunition in order to salvage his waning troop strength, seriously depleted by incessant B-52 strikes immediately prior to, and during the early phases of the operation. The enemy offered little or no resistance to allied efforts to open Highway 9; those contacts that materialized were mercetrated out of desperation upon being trapped by the highly mobile allies. In the later phases of the operation the enemy reacted primarily with standoff rocket and artillery attacks, many from the sanctuary of Laos. The new special forces camp to the west of Lang Vei was stubbornly defended by an estimated battalion, as was the prominent terrain features of Hills 881 North and 471. The enemy took full advantage of holding high ground to delay allied advances to the Laotian border.

Operation JEB STUART II brought the First Team back to the coastal plains to bolster security for the lst Air Cavalry Division base areas. The enemy conducted reconnaissance and resupply missions in preparation for a second offensive against Quang Tri and Hue City. High level coordination meetings were disclosed through numerous agent reports and many prepared rocket launching sites appeared completely encircling Camp Evans. Simultaneously, the enemy continued their efforts at opening a main supply route from the A Shau Valley to the mountainous area west of Hue City.

The last eleven days of the month of April, the enemy increased his repositioning activity considerably, moving large forces into Base Areas 101 and 114, as well as gathering supplies to support a planned offensive. The A Shau Valley became an area of deep concern to the enemy as the allied forces air assaulted into the long-time logistical complex and base area. The enemy had provided an excellent air defense cambility for the valley with at least two battalions of anti-aircraft gums, ranging in size from 12.7mm through

#### CUMPIDERMAL

SUBJECT: Operational Report for Owarterly Feriod Ending 30 April 1968
TAB F: Enemy Activity (Cont)

37mm. Their cache locations were defended in a semi-balanced condition with weighted area coverage, concentrated on forced avenue of approach. The enemy took full advantage of adverse weather conditions by exercising strict fire discipline: firing at all high flying and larger aimcraft, regardless of altitude, with all air defense weapons available.

At the end of the reporting period, the enemy offered only token resistance in the A Shau Valley, seemingly being content with occupying the highly mobile allies in that area and willingly giving up military stores for the advantage of being able to maneuver large fighting forces into Base Areas 101 and 114, estensibly for the purpose of initiating another offensive.

SUBJECT: Operational Report for Quarterly Period Ending 30 April 1948 TAB G: Aerial Surveillance

1. Mission Statistics for the Period 1 Feb-30 Apr 68. MISSION TYPE III MUF SCHO/COMP ASTA SCHO/COMP RESULTS IR 605/63 18/UNK TICE HOUSEOUS SLAIC 211/95 0/0 2209 HOVING TARGETS PHOTO 237/185 41/23 PHOTO (HAND HELD) 9/9 0/0

2. General Comments; Aerial surveillance continued to be severely curtailed by unfavorable weather conditions and the shortage of pilots.

A. IR. During the reporting period the ASTA Platoen was chie to complete only 10% of the scheduled missions. A total of 507 missions were cancelled due to weather conditions and 36 cancelled due to aircraft or sensor malfunction. The ASTA Platoon lost one OV-LC aircraft to ground fire on 6 Apr 1968. The aircraft was completely lost. No replacement aircraft has been received to date leaving the ASTA Platoon with 2 remaining OV-LC aircraft.

B.SL/R. The ASTA Platoon continued to support the Market Time operations in conjunction with the US Navy. A total of All missions were scheduled and 95 were completed. SLAR Operations were curtailed soverely by the loss of one OV-1B aircraft during a rocket attack at Hue-Fhu Rai on 24 Mar 68. A replacement OV-1B aircraft was received 21 Apr 68, but was not mission-ready until 27 Apr 68.

- C. PHOTO. A total of 237 missions were scheduled during the period of which 52 are still outstanding. A majority of the missions not completed are in the A Shau Valley. A total of 9 hand held missions were conducted by the 3d Brigade in planning their assault into the A Shau. Comouflage detection film was used on 8 missions during the month of Apr and in each case excellent results were obtained. Units desiring camouflage detection missions should submit approximately 4 target areas, assigning each a priority. This will allow the use of a full roll of film.

SUBJECT: Operational Report for Owarterly Period Ending 30 April 1968 TAB N: Intelligence Support Units.

1. Co E, 52d Infantry (IRP). IRP support was provided throughout the reporting period in Operations JEB STU/RT I & II, PEG/SUG and DELAMARE. A total of 66 missions were conducted during the reporting period with a total of 177 sightings of 1 or more NVA/VC. IRP teams continued to provide timely and accurate hard intelligence to the G2. The 1/9 Cav continued to support the IRP's with gunships and infantry platoons, as required.

2. 191st Military Intelligence Detachment. The 191st PTD continued to provide Order of Battle, Counterintelligence, Imagery Interpretation and Interrogation of Prisoners of War support to the Division during the reporting period. Liaison was made with existing intelligence gathering agencies as the

191st MID provided timely reports of enemy activity.

IPW and OB provided a continuing evaluation of the enemy's composition, strength, disposition and missions through their analysis of cartured documents and the interrogation of PW's. Two complete OB handbooks were disseminated during the reporting period, keeping the commanders and staff's at all levels

informed of the rapidly changing enemy situation.

3. Division Radar Platoon (Provisional). The Radar Flatoon provided limited support during the reporting period. The 50th Inf Radar Datachment was detached from the 1st ACD when the Division moved to I Corps. The Radar Platoon was formed with equipment and cadre remonnel of the 50th The with a mission of providing radar support to the 1st ACD as well as training radar operations coming in the replacement stream. The Radar Platoon supported all operations during the reporting period and was deployed in Operation DELATIRE at the close of April:

4. Detachment 31, 5th Weather Sodn (USAF). The IBAP continued to provide long range and daily weather forecasts to the 1st ACD. Weather was a critical

factor during the reporting period as previously indicated.

SUPJECT: Corretional R port for Currents Ferriod Ending 30 April 1958 TAB I: Summarm of 7-1 Activities

- 1. The period 1 Feb 6° to 30 April 19°3 shower an improved operating capability for the a encies and sections under the general staff supervision of the AC of S. (II. All sections/arencies continued to consolidate their activities at Camp Tyans to provide hether service for the division. A small element consisting of 1 officer and 1 clerk, served as TI Forward during Operation Ferasus/Jem Son 207A.
- 2. The operating strength of the division remained at approximately one hundred per cent of authorized. Ser losses during the period included ? Rettalion Commanders killed and ? medically evacuated. Genious shortanes continued to exist in Infantry and Irmor Captains, Girnal Officers, Tarrant Officer aviators (especially 0047 qualified), Infantry Illis and intillume 13A & Bis. A staff visit to UNITY IS was made to coordinate replacements during the peak summer rotation period and discuss personnel shortages.
- 3. Staff visits were made to lst C-value soldiers in hospitals throughout. Vi that. Lethods were worked out to provide a more extenditious smatem for redirecting mail.
- 4. Personnel Services for the division comtinued to expend and improve.
  - a. A Fost Exchange was opened at Camp Twons.
- b. A laundry operated by Vietnamese Tahionals was established at Camp Evans.
- c. A central barber shop with Local National barbers also opened for business.
- d. A been and some bulk sales outlet was established by the Mivision Club System.
  - e. A Piaster exchange point was established.
- 5. The division filler all In and Cut-of-Country To allocations during the period. As of 7 Parch all In-Country Rolls switched from Your Test to China Reach in Da Pant. The weekly allocations at China Reach increased in April from 84 to 110 per week.
- 6. The Custodian, Central Fost Fund, traveled to Japan and negotiated contacts for CFF business to include momentoes to be presented to all members of TUM FIRST TRAY departing Vietnam.
- 7. A program to reduce the number of officer, ICC and Unlisted clubs at Camp Radcliff was initiated. The the end of Arril all but 1 officer and 4 MCO/FM clubs had been phased out of operation.
- 8. In March 118 offenses were processed by the Provost Marshal's office indicating a high degree of discipline, law and order throughout the division. The division continued to strictly enforce the off limits policy for all populated areas except for these personnel conducting official business and tactical operations.
- 9. Due to contaminated water, there was an outbroak of gastroenteritis involving approximately 50% of the division during the last two weeks of April. Appropriate steps were taken to preclime a resocurence.

SUBJECT: Operational Report for Quarterly Period Ending 30 Arril 1966 TAB AA: G-4 Operations

1. General. During the period 1 Peb-30 Apr 68 combat service support was provided for five major operations: PERSHING, JEB STUART, PEGASUS, JEP STUART II, and DELAWARE.

2. The 2d Brigade remained in Operation PFR34ING until 20 Feb and was provided combat rervice support by the 1st FSE collocated with the bridge at

LZ Uplift.

3. Operation JEB STUART which began on 24 Jan continued until 31 March. The Division Support Command established the Logistical Control Center at Thu Bai. During the initial phase of the operation all supply support came to m FISG-A of the III MAF, Force Logistics Command located at Phu Rai. Shortl: after the beginning of the operation 1st Log Command formed the Ta Mang Support Command which was to assume responsibility for logistical support of all 113 Army units in ICT?. During the TET Offensive the LOC from Phu Pai to the division was cut because of the NVA occupation of Hue. To circumvent this, losistic support was shifted from FLSG-A to FLSG-B at Dong Ha and the operation. was supported by lami LOC from Dong Ha. Recause of the shortage of ground transportation it was necessary to surplement the resumply received by land LOC with emergency air drop of armunition and rations into Camp Evans. In early March, 25th General Support Group, the subordinate element of Ma Mann Support Command responsible for support of US Army units in Morthern JCT?, established a Logistical Over the Shore (LOTS) operational site at Wunder Reach and began providing resupply to the elements of the division from this source. By the conclusion of the operation logistic support from Wunder Beach had expanded to a point where most supply requirements were filled by material from this source although some supply was still being furnished by FLSG-A and FLSG-B.

A. The lot Brigade assumed responsibility for the Morthern rortion of the AO and established its base at LZ Retty. Combat service suprort was provided by the 2d FSE with FSA surport provided by Task Force Moroz. Resupply

was accomplished by land LOC from FLSG-B and Winder Beach.

B. The 2d Brigade 101st Abn was under the OPCON of the 1st Air Cavalry Division for the first part of the operation and assumed responsibility for the central portion of the AO. The brigade established its base at LZ Jane and was provided combat service support by the 2d FSE with FSE support from Task Force Moroz. Resupply was accomplished by land LOC from FISC-B and Wunder Beach.

C. The 3d Brigade assumed responsibility for the southern portion of the AO and established its base at Camp Evans. Combat service support was provided by the 3d FSE with FSA support provided by Task Force McDonald collocated with the FSE. Resuprly was accomplished by land LOC from FLSC-A, FLSC-I and Wunder Beach.

P. The 2d Brigade did not arrive in the JEB STHART AG until 1 March at which time they relieved the 2d Brigade 101st Abn. of responsibility for the central portion of the AO and established their base at L7 Jane. Combat service support was provided by the 1st FSE with FSE support from Task Force Moroz. Resurply was accomplished by land LOC from FLSC-B and Wurder Beach.

E. The 2d Brigade 101st after being relieved from the central portion of the AO remained OPCCN, moved to an area south of the 3d Brigade, and established a base at LZ Sally. Combat service support was provided by the organic FSE and resupply was accomplished by land LCC from Wurder Reach and FLSC-A. Soon after the move to the new area the 2d Bde 101st reverted to control of the 101st Abn.
